B.Tech – Computer Science & Engineering (IoT) | SRM IST | Expected 2027

EDUCATION

SRM Institute of Science and Technology – Kattankulathur | *B.Tech, CSE – Internet of Things* 2023 – 2027
CGPA: 9.62

Edustar International School, Kovilpatti | *Class XII – CBSE* 2022 – 2023
Score: 91%

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java
AI / ML & Deep Learning: Machine Learning, Deep Learning, Fine-Tuning, Scikit-learn,TensorFlow
Embedded & IoT: Arduino UNO, ESP32, Raspberry Pi, Firebase
Web & Frameworks: HTML, CSS, JavaScript, React, Node.js, Spring Boot, Angular, Flask
Tools & Technologies: REST API, Docker, MySQL, Linux, Git, Wokwi, Claude code, Pandas, NumPy
Languages: English (Professional), Tamil (Native), Telugu (Limited Working)

EXPERIENCE

Software Development Engineering Intern – BNY (Summer Intern) May - Jul 2026
- Selected among top 5 students from university cohort; awarded competitive internship with ₹75,000/month stipend.
- Contributing to software projects in the fintech domain; collaborating with cross-functional teams and industry mentors.

AI/ML Research Intern – King Faisal University, Saudi Arabia Jul 2025 – Present
- Working remotely under the mentorship of the NWC department, SRMIST on AI/ML research projects.

Web Development Intern – InternsTech Jun – Jul 2024
- Built and deployed responsive web applications; gained hands-on experience in full-stack development.

PROJECTS

Landslide Early Warning System (AIoT) | *Python, Flask, Scikit-learn, Arduino, ESP32, Firebase*
- Developed a real-time landslide prediction system integrating rainfall, soil moisture, and vibration sensors with Arduino UNO and ESP32.
- Built a Flask backend with a trained ML model for risk prediction; sent sensor data over HTTP and triggered cloud alerts via Firebase.

Stampede Detection System (Computer Vision) | *Python, PyTorch, CNN/ViT, OpenCV, Flask*
- Developed a computer vision model to estimate crowd density and detect potential stampede risks using grayscale crowd images.
- Implemented YOLOv8 object detection to identify and count individuals in dense crowd environments from surveillance footage.

Vision Bin – AI-Based Smart Waste Segregation System | *Python, YOLOv8, ViT, Flask, Raspberry Pi*
- Designed an AI-powered waste classification system using computer vision (YOLOv8/ViT) to classify waste into plastic, metal, paper, and organic categories.
- Integrated a camera module with a motorized sorting mechanism; deployed edge AI on Raspberry Pi for low-latency offline inference.

ACHIEVEMENTS & AWARDS

1st Place – IEEE E-JIGYASA Project Expo 2024 | Certificate Apr 2025
- Represented SRM IST and secured 1st place at a national-level innovation expo; presented a Smart Home Automation system with cloud-based IoT and ML.

IIT Madras – Walmart Center for Tech Excellence Workshop | Certificate Apr 2025
- Designed a sensor-based failure prediction pipeline (data ingestion → preprocessing → feature engineering → real-time LSTM inference) with a dashboard alerting system; achieved high recall for critical failure detection.

SRM Merit Scholarship | *SRMJEEE Rank 196* Jul 2023

3rd Place – Serbot Tech expo '25 | Certificate Nov 2025
- Awarded 3rd Prize at SERBOT TECH EXPO '25, recognized for innovation and real-time application by the Department of Networking and Communications, SRMIST.

CERTIFICATIONS & BADGES

Claude 101 – Anthropic Academy | Certificate of Completion Mar 2026
- Learned prompt engineering, tool use, agents, and Model Context Protocol (MCP) using Claude models.

AWS Academy Graduate – Cloud Foundations | Certificate Nov 2025
- Learned cloud computing fundamentals including AWS core services, architecture, pricing, and support models.
